IBA Institute of
Business Administration
Karachi

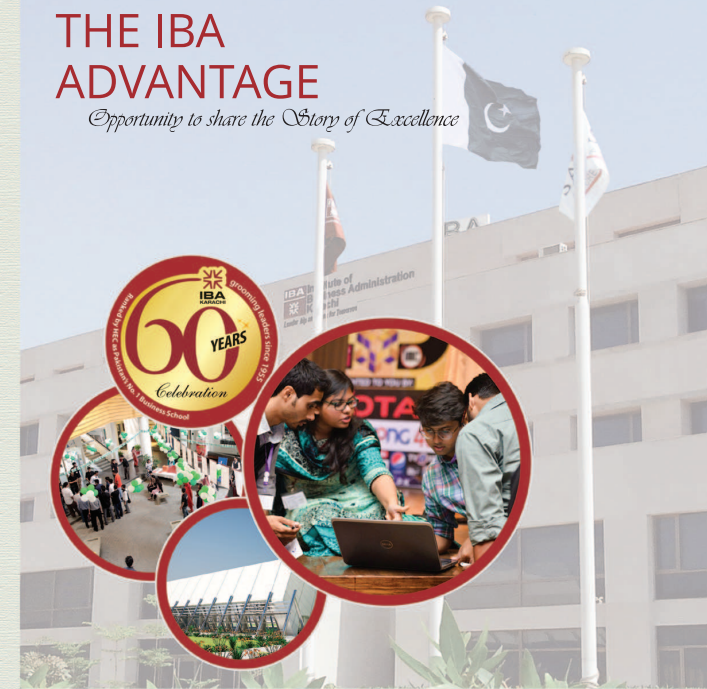

Leadership and Ideas for Tomorrow

Since 1955

SAQS
ACCREDITED

THE IBA ADVANTAGE

Opportunity to share the Story of Excellence

Message of Dr. Ishrat Husain (NI) Dean & Director, IBA

"IBA doesn't consider itself an old institute rather a learning Organization that is continuously reinventing itself. We have introduced new programs, transformed ourselves from a purely teaching to research institution, introduced case study method and experiential learning as new pedagogical tools, set up a centre for Entrepreneurial development, extended outreach to the community and businesses. In doing so we had to invest massively in infrastructure and ICT., recruit top quality faculty many of them either holding PhDs from best universities around the globe or in the process of pursuing PhD.

Our motto to prepare the leaders for tomorrow is practically translated through a holistic personality development of our students combining competencies with character and commitment. Our need blind admission policy and National Talent Hunt program have enabled many financially challenged students from backward districts to move up in the social ladder."

Programs of Study

Bachelor of Business Administration (BBA)

The BBA Program is a full-time 4-year bachelor's program often referred to as the core IBA program. The students go through an academic program that stresses not just the essentials of business subjects - but also acquaints them with the essential concepts of Social Sciences and Liberal Arts.

Bachelor of Business Administration (Entrepreneurship)

A 4-year degree program developed in partnership with Babson College of Entrepreneurship in Boston (USA). The programs develop students' abilities to formulate, explore and create ideas. It trains them to analyze disciplinary and inter-disciplinary subjects, and provides hands-on experience in industry, for applying the knowledge and training to generate and sell ideas in the real world.

Bachelor of Science (Accounting & Finance)

Developed jointly by the Institute of Chartered Accountants of Pakistan, ICAP and Institute of Business Administration, Karachi, this 4-year program provides an exclusive opportunity to the students to receive an academic degree that leads to a professional qualification. An exemption of 12 Exams of AFC and CAF (Old Module A to D) will be granted to the prospective CA students who complete their BS (Accounting & Finance) degree from IBA. After graduating from IBA Karachi, these students would avail the following benefits:

- Exemption from AFC and CAF (Old Module A to D)
- Complete training for 3 years & save 6 months
- Pass CFAP and MSA (Old Module E & F)
- Become a Chartered Accountant

Bachelor of Science (Economics & Mathematics)

A 4-year degree program with double majors in Economics and Mathematics; it is designed to give students a solid foundation in both Economics and Mathematics. It provides a well coordinated curriculum for students interested in pursuing Masters or PhD in Economics and Mathematics.

Bachelor of Science (Social Sciences and Liberal Arts)

A 4-year degree program with majors being offered in Political Science, Psychology, and Media & Communication Studies. The program is designed to develop in students the theoretical, historical, and experiential knowledge necessary to understand how we interact with our social world in local and global contexts. The program focuses on how students can use strategies and frames of social analysis to understand and critique our increasingly interrelated economic and politically mediated lives. Courses that comprise the Liberal Arts core introduce students to a selected range of traditional academic disciplines that comprise the liberal arts and sciences. Through these courses, students will acquire comprehensive skills in both qualitative and quantitative thinking and analysis before they engage their major field of specialization.

Bachelor of Science (Computer Science)

The BS (CS) program is a four-year, broad-based program, providing students with a sound theoretical knowledge of the field, while equipping them with a thorough practical grasp of the current tools and techniques being used in the industry.
